CALLING ALL DOGS!

Join the largest dog health study in the world and help dogs live longer, healthier lives!

The Dog Aging Project team is studying tens of thousands of companion dogs for ten years in order to identify factors that maximize healthy longevity and help future generations of dogs live the best lives possible.

Join at-home research activities:

Enroll your dog at **dogagingproject.org** (or Text "Dogs" to 6866)

Complete surveys about canine health, diet, behavior, and more

Upload your dog's electronic medical records

Engage your dog in at-home behavioral assessments

Help study the genetics and physiology of aging from your own home

Connect with others in a private, online community of fellow dog lovers

---

ALL dogs are welcome — young and old, mixed breed and purebred, those in good health, and those with chronic health conditions. **If you and your best friend are interested in joining us, start the process!**

NIH The Dog Aging Project is a non-profit, academic research study funded by the National Institute on Aging, part of the National Institutes of Health, and other partners. We don't sell products or data. All of our canine participants live and play at home with their families.
