WE ARE LOOKING FOR OLDER DOGS TO TEACH US MORE ABOUT AGING!

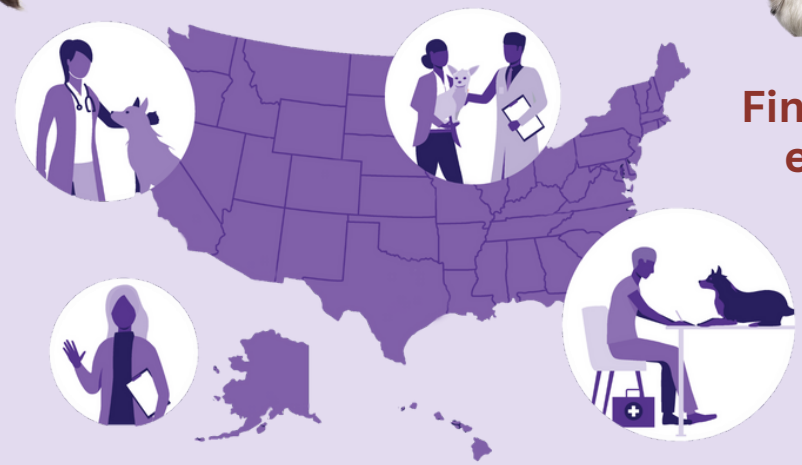

If your dog is **7 years or older** and is between **44 -120 pounds**, they may qualify to participate in our **TRIAD clinical trial.**

(The study is designed to test whether rapamycin improves healthy aging in companion dogs.)

CLINICAL TRIAL SITES ARE LOCATED THROUGHOUT THE U.S.

Find out if your dog is eligible for TRIAD

✳ If your dog doesn't qualify for TRIAD they can still make an incredibly meaningful contribution to our project and the future health of dogs by becoming a member of our greater DAP Pack!

Dog Aging Project

Longer, healthier lives. Together.

More participants mean more data to understand how we can help our canine friends live longer, healthier lives in the future!

✳ **Sign up at DogAgingProject.org/TRIAD**
